Philip Groner, Executive Director

Governor Kim Reynolds

Lt. Governor Adam Gregg

November 16, 2018

The Honorable Governor Kim Reynolds
Governor, State of Iowa
State Capitol
Des Moines, Iowa 50319

Dear Governor Reynolds:

On behalf of the Iowa Telecommunications and Technology Commission overseeing the Iowa Communications Network (ICN), I am pleased to submit our Fiscal Year 2018 Annual Report for your review. Throughout the report you will find information explaining how strong high speed Internet, voice, video, and security services continue to provide exceptional value to our authorized users. Highlights include:

- Partnering with the Iowa Homeland Security & Emergency Management (HSEMD) to provide a private and secure network for 911 wireline (landline) calls.
- Enhancing our video conferencing product to enable users the ability to collaborate on nearly any device that has an Internet connection, a web camera, microphone, and speakers.
- Launching a customer online service portal, which provided a digital transformation for ordering services, issuing trouble tickets, and agency-wide automation.

Our Broadband Strong vision continues to guide the ICN in Fiscal Year 2019. The Commission and ICN have a number of broadband initiatives that will benefit our users. Those initiatives include:

- Implementing a new digital billing system that will enhance customers' ability to view and interact with financial data.
- Building and maintaining an IP network with Ethernet as the carrier-grade technology. Current estimated broadband growth rates indicate that the need for bandwidth will reach over 100 GBs within the next 5-10 years.
- Working with Iowa Hospital Association (IHA) to replace legacy equipment to meet the growing needs of redundancy to hospital sites, as well as the increased need for bandwidth greater than 1GB speeds.

As we look to the future, ICN will stay true to its mission of providing strong, flexible, and fast broadband to its users. On behalf of the Commission and all ICN employees, we appreciate the opportunity to be of service.

Sincerely,

Richard L. Bruner
Chair
Iowa Telecommunications and Technology Commission

Iowa Communications Network

Grimes State Office Building, 400 E. 14th Street, Des Moines, IA 50319 Phone: 515-725-4692 Fax: 515-725-4727 www.icn.iowa.gov

Iowa Telecommunications and Technology Commission Members

Richard Bruner, Chair | Kelly Dolan Lange | Timothy Lapointe | Robert F. Holz
Mary Mosiman, Ex-Officio | Robert von Wolfradt, Ex-Officio

Kate Kohorst's commission term expired on April 30, 2018. Kohorst did not seek reappointment.

2018 Legislative Session Recap

Iowa Telecommunications and Technology Commission (ITTC)

Robert (Bob) Holz

Commissioner Holz was appointed by Governor Branstad in May 2017, and confirmed by the Senate on March 5, 2018.

House File (HF) 2254 - A bill for an act relating to 911 emergency telephone and internet communication systems, making appropriations, and including effective date provisions.

This bill authorizes the Department of Homeland Security and Emergency Management (HSEMD) to combine the wireline and wireless 911 services in Iowa. The ICN has been awarded a portion of that task through a competitive bidding process completed by HSEMD.

- Signed by Governor Reynolds on April 4.

Senate File (SF) 2235 - A bill for an act relating to criminal acts committed on or against critical infrastructure property and providing penalties.

The bill establishes the crime of critical infrastructure sabotage and creates a Class B Felony for destruction of telecommunications and broadband infrastructure.

- Signed by Governor Reynolds on April 17.

ICN contracts exceeding \$1 million during FY 2018, as required by the Code of Iowa, Section 8D.3(3)(f).

- 17-001 Calero Software, LLC.
- 17-107 Master Ethernet Contract: multiple vendors (35)

Agency Overview

Finance Bureau

Ensures the agency has the resources available to carry out its operational and strategic goals, while following applicable federal & state accounting rules & policies.

Responsibilities:

Accounts payable; accounts receivable and collections; auditing; billing; general ledger and inventory reporting; purchasing/warehouse; work orders.

Page
5

Business Services Bureau

Offers telecom consulting to customers, project & order management, customer service to the sectors we serve, as well as visual presence, media, and public relations.

Responsibilities:

Account Consultants (Sales); project management; customer support; marketing and outreach; E-rate administration.

Engineering/Operations Bureau

Manages cutting-edge technology, monitors the Network, and provides in-depth knowledge to secure the statewide fiber optic network environment.

Responsibilities:

Develops, designs, installs, and supports infrastructure/systems; upgrades technology, reduces legacy infrastructure, and facilitates automation; maintains high network availability with minimal disruptions; focuses on presale design as well as transport design; oversees vendor managed services.

Network Services Bureau

Provides functions from cybersecurity monitoring and active response measures to managing business applications; from installing & repairing infrastructure wiring to mapping fiber routes.

Responsibilities:

Cybersecurity; fiber locate requests, mapping geographic information systems (GIS), and computer aided design (CAD); application integration & database development; wiring data closets plus wiring of fiber & copper infrastructures.

ICN Services Update

Internet, Voice, Video, and Security

Page
6

Internet

Internet & Ethernet service used by sector:

- 302 education facilities (Public & Private K-12, AEA's, and Community, Private and State Colleges)
- 75 government users (State, Federal, City of Des Moines)
- 358 healthcare locations (hospitals, clinics, & other providers)
- 187 public safety locations (including towers)
- FY17 total Internet purchased was 102 GB, compared to FY18 total of 117 GB (14% increase)

87% of the Internet provided by the ICN is being used by educational entities (102 GB education, 15 GB non-education).

Voice

Our managed voice service is an IP platform that is hosted from a cloud environment. This advanced managed voice system includes ICN provided hardware and licenses while offering premium and professional support for service management and technical configurations.

Recently added or converted customers:

- Prairie Lakes Area Education Agency, Pocahontas and remote offices
- Dept. of Natural Resources, Des Moines
- Dept. of Public Safety, Post 16, Des Moines
- Legislative Services, Capitol, Des Moines
- Dept. of Agriculture & Land Stewardship
- Dept. on Aging, Des Moines and remote offices
- Fort Dodge Correctional Facility

Video

44,706.38 Internet Protocol (IP) video hours were produced by customers.

2,410.8 full motion video hours were produced by customers.

ICN's full motion video service was sunsetted on June 30, 2018. Customers transitioned to an enhanced IP video service, LightSpeed Plus.

Security

18 customers are subscribed to ICN's Managed Firewall service with partner LightEdge.

- 35 Cyber Threat Assessments (CTAPs)* have been completed.

126 organizations either directly or as part of an aggregated Internet solution were provided DDoS protection by the ICN in FY18.

- 19,618 DDoS attacks were mitigated in FY18.

*Cyber Threat Assessments (CTAP) for Managed Firewall Customers

A CTAP monitors a customer's network infrastructure in a non-invasive way. After the monitoring, an analysis is provided based on the data collected using the following components. ICN's Managed Firewall Partner, LightEdge, performs the CTAPs.

- *Security and Threat Prevention:* Identify high risk applications and malware/botnet events
- *User Productivity:* Application Usage & Web Usage
- *Network Utilization:* Firewall Statistics

ICN Enhances Video Service with Pexip® Infinity

ICN launched LightSpeed Plus, which brings native video, audio, and content-sharing by integrating the Pexip® Infinity platform, an award-winning cloud enterprise application.

Users can collaborate on nearly any device that has an Internet connection, a web camera, microphone, and speakers. This enhanced video experience provides easy-to-use functionality.

Page
7

- Conference using PCs, laptops, or iOS/Android/Windows mobile devices.
- Use Virtual Meeting Rooms (VMR) for pre-arranged conferences / unscheduled video calls.
- Integrate third party recording/streaming.

The End of MPEG Video

As planned, ICN sunsetted its legacy full-motion MPEG (Moving Picture Experts Group) video service as of June 30, 2018. At the height of the MPEG usage, the video classrooms generated over 300,000 conferencing hours per year.

The following are MPEG video highlights.

600 Video Classrooms: In late 1997, the 500th full-motion video classroom was connected to the Statewide Network, followed by the 600th classroom in 1998.

Freedom Calls: ICN and the Iowa National Guard joined the Operation Hometown Link initiative of the Freedom Calls Foundation. ICN provided Iowa families with free video reunions with their Iowa family member(s) who were stationed in Iraq and Afghanistan.

Worldwide Recognition: In 2008, Government officials from Eastern Europe with the Academy in Moldova visited ICN with the plans to connect students with similar technology that Iowa incorporated with the ICN.

Virtual Field Trips: Iowa students participated in virtual field trips offered by Iowa Public Television (IPTV) using the video classrooms connected to the ICN.

4 Million MPEG Hours: ICN users generated over 4 million MPEG video hours since 1992.

SYBAC Continues to Deliver Strong Broadband Discussions

Page
8

Fifteen students across Iowa interacted in the third year of ICN's Statewide Youth Broadband Advisory Council (SYBAC). Throughout the school year, the students met via video conference with ICN's Leadership.

The following students were selected to ICN's SYBAC for the 2017-2018 school year:

- Alaina Allen, English Valleys Jr-Senior HS
- Connor Baack, Southeast Polk HS
- Lewis Callaway, Clear Lake HS
- Kyle Cortez, Cedar Rapids HS
- Josiah DeValois, North Polk HS
- Austin Grant, Boyer Valley HS
- Beau Lapointe, Mason City HS
- Meghna Mallapan, Des Moines Public HS
- Olivia Moore, East Union HS
- Cole Mundus, Earlham CSD
- Cole Schippers, ADM HS
- Lucas Schwamman, Osage HS
- Jonathyn Stiverson, Council Bluffs HS
- Olivia Tidwell, Sioux City HS
- Blake Van Der Kamp, Prairie City Monroe (PCM) HS

Recap of Technology Topics Discussed by SYBAC

Topics discussed during the monthly video meetings.

- Facebook's data breach: How much information do companies share about you?
- Autonomous cars: How soon will they be more common than not?
- If augmented reality is to become the primary computing environment, what form will it take?
- Government involvement in providing Internet to the public.
- Public Wi-Fi, who is responsible for security? The user, the internet service provider or the business offering it?
- Removing passwords and using other ways of authenticating the user. How many layers of security are you willing to go through?
- Will computer science be required in schools in the future?

ICN Partners with Iowa HSEMD to Merge 911 Networks

ICN Selected to Merge Wireline (Landline) Network with Wireless Network

In October 2017, ICN announced the partnership with Iowa Homeland Security & Emergency Management (HSEMD) to provide a private and secure network for 911 wireline (landline) calls. ICN will provide infrastructure and services for merging the existing wireline carrier network, consisting of all the State's wireline service providers, onto HSEMD's Next Generation 911 (NG911) IP Network.

Page
9

The merged network will be able to handle up to 10GB per link of capacity and will include protected power, protected paths, and redundant equipment. This project will merge the wireline call delivery with the

NEXT GENERATION 911 Voice, Video, Text, & Data

wireless call delivery architecture. Currently, analog wireline calls and wireless 911 calls are delivered using separate networks. ICN will aggregate analog wireline 911 calls, convert the calls to IP, and merge with HSEMD's existing NG911 network.

Benefits to ICN's network merging plan include:

- Limited maintenance downtime between the combined wireless/wireline networks.
- Public safety grade service level agreements.
- Ability to dedicate 24/7/365 network monitoring, maintenance, and support to maximize critical service needs.

ICN will continue to support legacy circuits as well as the future IP based platforms. After completion, all carrier 911 traffic will be consolidated to HSEMD's NG911 two data centers.

ICN currently delivers all wireless NG911 calls to 113 public-safety answering points (PSAPs).

Background:

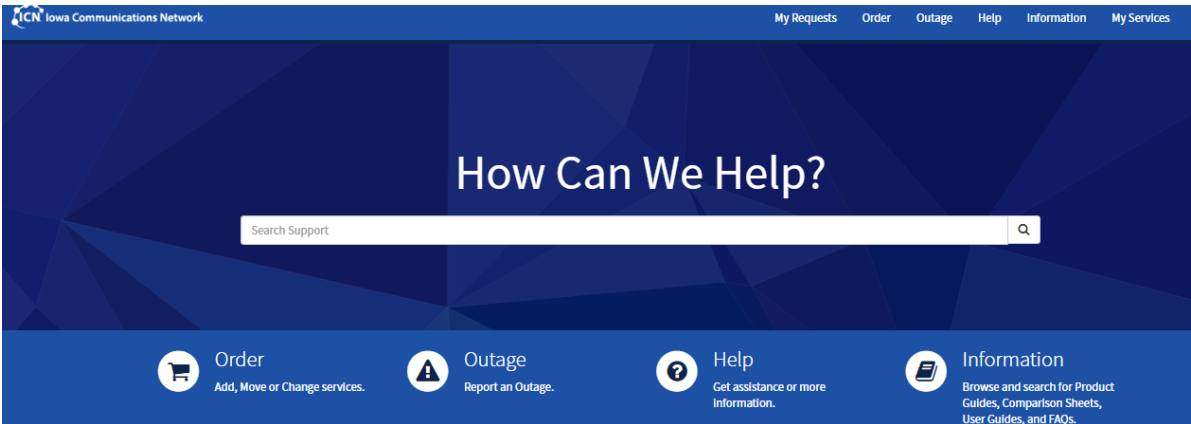

Senate File 500, enacted during the 2017 legislative session, charged HSEMD with identifying potential cost savings through two potential methods: merging the legacy wireline 911 network with the Next Generation Wireless 911 Network and sharing PSAP services. HSEMD's 9-1-1 Consolidation Study can be found on the HSEMD's website.

BROADBAND STRONG
STRONG FLEXIBLE FAST

A New Customer Online Portal Transformation

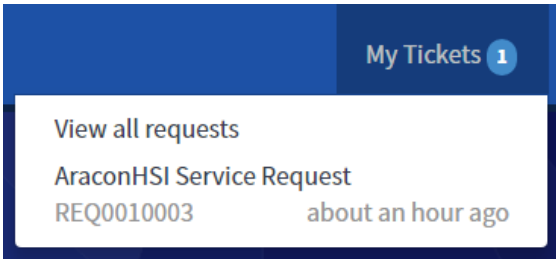

A Customer-Facing, Web Enabled Application

A digital transformation occurred for ICN’s customers with the launch of a new customer online portal. The ServiceNow portal is a customer-facing, web enabled, and mobile enabled application, which provides customers a direct interface into ICN’s service catalog. On November 1, ICN released over 2,000 customer notices regarding the launch of the new portal. There were 1,792 portal visitor views, with 204 unique logins.

After the launch, two module enhancements were issued related to trouble tickets and moves, adds, and changes. Customers could view incidents, submit problems, follow workflow, and obtain status updates. Customers have a direct way to provide additional information to the specialist(s) working to resolve the issue.

On January 1, the ServiceNow portal was deployed across the entire ICN organization. This application change provided benefits of greater efficiency to ICN’s customers. By integrating ServiceNow throughout the agency, ICN transitioned off of a previous Service Desk ticketing system and request for service (RFS) application, which was originally deployed in 2001.

After an Order has Been Submitted: Customers can select “My Tickets” to select any previous Order to view its status.

Progress of the Order: Customers have the ability to see the specific REQ number (Order number) or select “Contact ICN” to ask questions related to that Order.

Looking Ahead to Fiscal Year 2019

New Customer Billing System

Customers will notice a new digital transformation within ICN's billing system in Fiscal Year 2019. Testing of the online system is being performed to ensure financial data is integrated successfully. Customer benefits include:

- Credits and payments will be applied to specific invoices.
- A summarized and easily readable invoice.
- Access to a financial customer web portal.
- Billing notices sent via the billing application.

Page
11

Core Network Upgrade

Given the current estimated broadband growth rates, the need for bandwidth will reach 100+ GBs within the next 5-10 years. The ICN is building an IP network with Ethernet as a carrier-grade technology. The Core upgrade involves building and maintaining a 100 GB native network that is scalable to meet our customers' broadband, voice, video, and security demands.

Power Upgrade

A power upgrade is needed for various facilities and network equipment. This project will provide a positive impact on a number of other projects including the ICN Core upgrade and the Iowa Homeland Security & Emergency Management 911 initiative. The power upgrade consists of updating:

- Batteries for backup services
- Rectifiers to convert power (AC to DC)
- Generators
- HVAC for Cooling

Managed Voice Service (MVS) Migration

ICN is currently implementing MVS throughout the State of Iowa. Working in partnership with CenturyLink, over 4,477 seats (phones) were installed in FY18. The migration to the new Voice service from the legacy Voice equipment is anticipated to be completed in FY19.

Agencies have benefited by using our managed Voice service for disaster recovery purposes. Customers can access the Voice application from any device where Internet is available, including a computer, tablet or smartphone at any location.

Healthcare Network Equipment Upgrade

The ICN has been the technical, engineering, and maintenance provider of the Iowa Hospital Associations' (IHA) network program called the Iowa Rural Healthcare Telecommunications Program (IRHTP) since 2008.

Currently the ICN is project managing and deploying the install of a complete network upgrade on behalf of the IHA. This install will replace legacy equipment with the latest Multiprotocol Label Switching (MPLS) network capabilities to meet the growing needs of redundancy to hospital sites, as well as the increased need for bandwidth greater than 1 GB speeds.

FY18 Financial Information

Iowa Communications Network

Page
12

The ICN generated over \$31M in revenues from billed services to authorized users. The ICN did not request or receive appropriated funds from the state for fiscal year 2018.

The "Payments by Vendor Type" graph shows how the revenue generated is used in supporting the network. The largest ICN expense in FY18 was the network maintenance agreements and payments to vendor telecommunication companies supplying voice, data transport and internet services. Payment for the cost of the "last-mile" connections that are leased from telecommunications companies is directed back to Iowa's private sector providers.

* Expenses to outside vendors only - excludes payroll and employee reimbursements

ICN's financial statements are shown using Generally Accepted Accounting Principles (GAAP). As a government entity in a fee-for-service environment, ICN uses accrual accounting with a measurement focus emphasizing the matching of revenues with costs of services including depreciation of assets such as network equipment and fiber. Most other State of Iowa agencies use the modified accrual accounting method with a measurement focus emphasizing control and accountability over the raising and spending of public monies.

Operating
Budget Proposal

For the Fiscal
Years Ending
June 30, 2018
(Budget)
June 29, 2019
June 28, 2020
(Proposed Budgets)

The FY18 drop from equity is the result of spending on network core upgrades that are necessary to maintain a strong, fast and flexible network. The funding for the expected costs for this phase of the core network upgrade will be mostly provided by re-investment of equity realized in prior fiscal years.

FY18 Financial Information

<u>NET CASH (DEFICIT) FROM OPERATIONS & EQUIPMENT GROWTH</u>	<u>(\$2,485,484.96)</u>	<u>(\$3,714,189)</u>

This report is used as an internal cash management tool and is not based on full accrual accounting. It includes only revenues from operating activities plus some revenue from non-operating activities that are deposited in operating cash such as interest income. It does not contain any non-cash expenses such as depreciation. All revenues and expenses from appropriated monies and grant awards have been excluded.
